Maura Angke Ferry Port

Muara Angke Port

Zoeflig usher in comfort and connection in North Jakarta, Indonesia.

Muara Angke Port is the only port of the Jakarta administration that serves residents from mainland Jakarta to the Seribu Islands, making it invaluable to both residents and tourists. The port underwent a major revitalisation in the summer of 2022 and the Zoeflig team were delighted to lend our expertise.

The port revamp was needed to reflect the requirements and standards of today's modern traveller, with passenger comfort as a critical consideration. To meet these high standards, the team supplied and installed a total of 900 inFINITE seats for the port's in line with the new concept and standard of Indonesian port.

The government of Indonesia introduced a new concept of Indonesian ports that started by building 4 ports in a different part of Indonesia as a pilot project. One of these is Muara Angke Port. The new concept brings a modern layout, passenger comfort, efficiency, and decent and modern facilities as a standard. This concept and standards will be applied to any new ports that will be built in Indonesia.

As well as an exceptionally ergonomic design for increased comfort, inFINITE is the only truly modular seating system in the passenger terminal seating sector. The unique, award-winning beamless design also provides countless reconfigurability to support the changing demands of a modern port.

We provided three different seat configurations to meet the specific requirements of Muara Angke Port; inFINITE Linear, in straight rows; inFINITE Arc, in curved rows, and inFINITE Solo, in three seat clusters. Featuring our own specially developed Z-form polyurethane and Dura-Z injection moulded structural components, inFINITE takes resilience and durability to new heights. It delivers the highest standards of ergonomics and is exceptionally easy to clean, allowing the seats to withstand high passenger traffic-flow with ease.

inFINITE also offers a high degree of design flexibility, thanks to the huge range of colour options available, alongside a wide variety of stunning finishes including laminated wood and leather upholstery.

Situated on two hectares of land, Muara Angke Port has been updated and equipped with various facilities to create a sense of comfort for passengers. As well as the air conditioned waiting room, the port now includes a large parking area, canteen, food court and garden, to serve a capacity of up to 2,040 passengers.

The local government hopes the revamped port will help shape the community's character, and bring a more significant impact on tourism and Zoeflig is proud to contribute to this next stage of passenger comfort and satisfaction.

Zoeflig has been the seating supplier of choice for transportation gateways across the globe for over 50 years, due to our unrivalled approach to design, manufacturing, installation and servicing. With passenger comfort at the heart of everything we do, and a team of experts that approach each brief as a real partner, you can be confident that we have the expertise required to bring your vision to life. We're proud to provide seating for airport terminals, railway stations, bus depots, ferry ports and more, so contact our team today to discuss your unique seating requirements.
