# Contact Seating Range

A touch of class from Zoeftig

Pure, distinct forms and seamless connections combine to create an approachable piece of statement furniture which is simultaneously modular and integrated.

The Zoeftig name has long been synonymous with innovation and the highest possible quality standards. And this commitment to finding new and better solutions to our clients' project requirements continues to be the foundation for everything we do.

Zoeftig leads the way in the design of seating for terminal market and transport waiting areas, as well as offering a full range of products and services for waiting areas in the healthcare, judicial and government markets.

Over the years, Zoeftig's pioneering seating products have revolutionised the industry and can be found in airports, railway stations, bus depots, cruise and ferry terminals and waiting rooms the world over.

Contact represents another elegant addition to the Zoeftig product portfolio and continues the company tradition of developing products that push back the boundaries of seating design.

Manufactured to Zoeftig's exacting quality standards, and as aesthetically appealing as it is resilient and flexible. Available in both upholstered and PU options, Contact is perfectly suited to use in passenger terminals and waiting areas in the health care, judicial, corporate, commercial and retail environments.

Even more impressively, Contact is available at a surprisingly affordable price.

Adjustable feet make for secure positioning

## Keeping the quality, at an ultra affordable price

Contact is unique. A seating system that's easy on the eye – and just as easy on the pocket.

Despite the affordable price, Contact does not compromise on quality. On the contrary, with its clean lines, refined touches and ergonomic design, Contact looks every inch the dependable seating solution from a superior brand. A simple, elegant and cost effective seating product.

In typical Zoeffig fashion, innovation has played a major part in bringing down the cost of Contact. By radically rethinking the design of the structure, beam and support systems, along with the construction and configuration of the seating, we have been able to deliver a product that's big on looks and performance, but smaller on price. The very slightly reduced dimensions and streamlined options have also helped contribute towards Contact's competitive price positioning.

Due to the modular nature of Contact and its clever mounting design, it is available in a wide range of seat centres to suit every situation.

Raised seat height options ensure full ADA and DDA compliance

Contact is available with or without arms

Beautifully designed connections make for easy assembly, disassembly and reconfiguration

Visual transparency for increased safety is a major design consideration. The simplicity of the design avoids dust traps around the joints and the choice of materials also aids easy cleaning

## A seating system that doesn't cost the earth

Contact is helping reduce the cost in other ways, too.

It has been designed and manufactured in accordance with the requirements of ISO 14001 and our company environmental management system that ensures we minimize any adverse impact of our operations on the environment.

The result is a product sustainably manufactured from recyclable materials.

With the use of a simple linking bar, Contact can be arranged in back to back configurations

# Seating setting the right example

Corporate and social responsibility

At Zoefitig, we are continually developing our manufacturing process and operations in order to minimise their impact on the environment.

As well as offering unprecedented levels of flexibility, Contact is a shining example of sustainable production.

Even the in-built flexibility of the product itself plays an important sustainability role. Because the modularity and ability to adapt to change extend the lifespan of the product, Contact promotes a more environmentally responsible approach to product procurement.

Aside to the specific environmental benefits of Contact, Zoefitig has an overriding environmental commitment embodied in the Corporate and Social Responsibility (CSR) policy that sits at the heart of our business. This encompasses three main areas:

- **Environment** – we are constantly exploring how to minimise the environmental impacts of our products and operations through increased product longevity, better materials, more sustainable designs and manufacturing processes and improved waste management
- **People** – we value our people enormously and are committed to their development, fostering an environment where independent and creative thought is encouraged, and where staff have the opportunity to build on their skills
- **Community** – as well as financial aid for local charities, we are looking to the future by developing award-winning links with the local community, including local universities and participation in the Knowledge Transfer Partnership.
