

Case study

Tromsø, Norway

Tromsø Airport Expansion

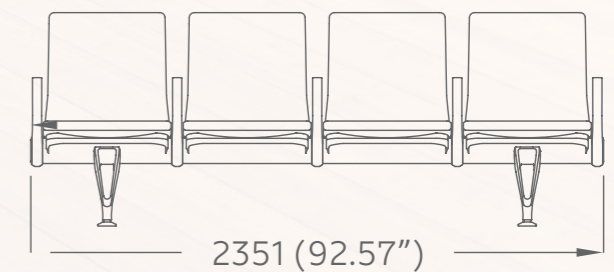

Zoetig ventured far to the North for a new project on the Terminal expansion at Tromsø Airport in Norway. The airport, located deep into the Arctic Circle, is undergoing a growth phase to improve its facilities for passengers.

The challenge set for Zoetig by Avinor and the Nordic Office of Architecture was to provide seating that was not only functional and comfortable but also reflected the unique Arctic environment of Tromsø. The solution was our inFINITE seating range with bespoke upholstery in complimentary shades of blue, designed to evoke a feeling of the Arctic landscape. The custom beam structure, arms, and legs of the seating echo the dark mountainous rock seen in the local area.

To further enhance the passenger experience, we incorporated our Charge Plus power unit, which provides USB-A, USB-C, and mains power to the seats, so that the terminals travellers will always be able to charge their devices while waiting for flights.

Product Specification Overview

- inFINITE beamless seating
- Bespoke upholstery in synthetic leathers
- Custom finished structures
- Charge Plus power units: USB A/C, mains power

Dedicated to public seating perfection
