

Case study

Ferenc Liszt International Airport, Budapest

Zoeflig

Ferenc Liszt International Airport

Ferenc Liszt International Airport (BUD) is the gateway to Hungary, a key player of the national economy. It is continuously developing its services, and provides a high-quality passenger experience and reliability for its passengers, which is backed up by numerous international awards.

We provided BUD with our award winning inFINITE seating solution a bespoke colourway. The supplied seating is designed to display the BUD corporate colours and match in with the airports branded touchpoints, such as the wayfinding markers on the terminals floor and digital typography on screens.
