

Case study

Van Don International Airport

Van Don International Airport, Quang Ninh, Vietnam

Van Don International Airport (VDO) is Vietnam's first privately operated airport serving both domestic and international flights to and from Quang Ninh province.

VDO serves as a gateway for tourists visiting the breathtaking Ha Long Bay and its surrounding areas. This modern airport was constructed in 2016 and has been facilitating domestic and international arrivals and departures since its inauguration on December 30, 2018.

Zoetig provided VDO with our award winning inFINITE seating system in linear, and S-curve configurations, both of which feature between seat Charge Plus power units that ensure VDO's travellers are full on battery before and during any departing flights.
